CAREER STATEMENT

I am a dedicated and innovative junior plastic surgeon with a profound commitment to transforming lives through precision, artistry, and compassion. With extensive experience spanning complex procedures such as neck dissections and breast reconstructions, I strive to restore both form and function, empowering patients with renewed confidence and improved quality of life. My clinical PhD research on the cutting-edge application of indocyanine green (ICG) in breast cancer surgery exemplifies my dedication to advancing the field through evidence-based innovation and surgical excellence. Having immersed myself in the principles and practices of the Australasian healthcare system, I am eager to bring my expertise, passion, and patient-centred philosophy to deliver outstanding care while driving progress in plastic and reconstructive surgery.

QUALIFICATIONS

Qualification	University	Course Description	Country of Issue	Year Obtained
Doctor of Philosophy (Plastic Surgery and Oncology)	First Moscow State Medical University Sechenov	Clinical PhD Program	Russian Federation	2025'
Specialist Plastic Surgeon	First Moscow State Medical University Sechenov	Specialist Training Program	Russian Federation	2022
